THE JOURNAL OF HAND SURGERY

British Volume 13-B 1988

Author index

A

Abrahamsson, S.-O. *With* Sollerman, 426-429
Ackerman, G. N. *With* Breen, 286-287
Altissimi, M. and Mancini, G. B. Surgical release of the median nerve under local anaesthesia for carpal tunnel syndrome, 395-396
Amadio, P. C. *With* Hankin, 298-302
Ames, E. L. *With* Tonkin, 204-209
Andersen, J. C. *With* Sjølin, 75-76
Andersen, J. L. *With* Langhoff, 77-79
Andrew, J. G. and Sykes, P. J. Duplicate thumbs: a survey of results in twenty patients, 50-53
Angrigiani, C. *With* Zancolli, 130-135
Anouchi, Y. S. and Froimson, I. Hand infections with *Mycobacterium chelonei*: a case report and review of the literature, 331-332
Austin, G. J. and Nalebuff, E. A. Ten year follow-up of congenital fusion of proximal interphalangeal joints treated by flexible implant arthroplasty: a case report, 342-344
Austin, S. *With* Clay, 100-101

B

Bailey, B. N. *With* Regan, 406-407
Bainbridge, L. C. *With* Elliot, 311-312
Baker, M. *With* Prince, 328-330
Barker, A. *With* Dove, 408-410
Barry, K., McGee, H. and Curtin, J. Complex dislocation of the metacarpo-phalangeal joint of the index finger: a comparison of the surgical approaches, 466-468
Barton, N. J. *With* Warren-Smith, 83-86
Battiston, B. *With* Brunelli, 345-347
Baux, S. *With* Kuhlmann, 379-382
Bayon, P. and Pho, R. W. H. Anatomical basis of dorsal forearm flap, 435-439
Bickerstaff, D. R., Harris, S. C. and Kay, N. R. M. Osteosarcoma of the carpus, 303-305
Boabighi, A. *With* Kuhlmann, 379-382
Bollen, S. R. Peri-triquetral-lunate dislocation associated with ulnar nerve palsy, 456-457
Bonnici, A. V. and Spencer, J. D. A survey of "trigger finger" in adults, 202-203
Boyes, J. H. *With* Pfeffer, 28-34
Boyle, J. C., Smith, N. J. and Burke, F. D. Vibration white finger, 171-176
Brauer, S. E. *With* Foy, 477-478
Braunstein, E. M. *With* Hankin, 298-302
Breen, T. F., Gelberman, R. H. and Ackerman, G. N. Elbow flexion contractures: treatment by anterior release and continuous passive motion, 286-287
Brenkel, I. J. *With* Prosser, 87-91
Brennen, M. D. *With* Small, 136-145
Brunelli, F. *With* Brunelli, 345-347
Brunelli, G., Vigasio, A., Battiston, B., Guizzi, P. and Brunelli, F. Traumatic aneurysms of two proper digital arteries in the same patient: a case report, 345-347
Bryan, A. S. and Ghorbal, M. S. The long-term results of closed palmar fasciotomy in the management of Dupuytren's contracture, 254-256
Burke, F. Mallet finger (editorial), 115-117
Burke, F. D. *With* Boyle, 171-176

C

Carus, D. A. *With* Mitchell, 259-261
Cavalazzi, R. M., Spreafico, G., Galli, C. and Raimondi, P. A neurilemmoma and a neurofibroma in the same nerve trunk, 96
Chandra, D. *With* Wee, 224-226
Chaudakshetrin, P., Kumar, V. P., Satku, K. and Pho, R. W. H. The arteriovenous pattern of the distal digital segment, 164-166
Chesney, R. B. *With* Craigen, 306-307
Citron, N. and Foster, A. Some aspects of lumbrical function, 54-59
Clay, N. R. and Austin, S. Idiopathic thenar muscle hypertrophy, 100-101
Clay, N. R. and Clement, D. A. The treatment of dorsal wrist ganglia by radical excision, 187-191
Clement, D. A. *With* Clay, 187-191
Craigen, M. A. C. and Chesney, R. B. Metastatic adenocarcinoma of the carpus: a case report, 306-307
Crichlow, T. P. K. R. and Hoskinson, J. Avulsion fracture of the index metacarpal base: three case reports, 212-214
Cristiani, G. *With* Luchetti, 19-22
Cross, A. B. Rupture of the flexor pollicis longus tendon resulting from the non-union of a scaphoid fracture, 80-82
Curtin, J. *With* Barry, 466-468
Curtin, J. *With* Moran, 453-455

D

DaCruz, D. J., Slade, R. J. and Malone, W. Fractures of the distal phalanges, 350-352
Dave, P. K. *With* Kotwal, 479-480
Deenstra, W. Synovial hand infection from *Mycobacterium terrae*, 335-336
Devine, Cecilia A. *With* Grunert, 177-180
Dhar, B. K. *With* Marck, 221-223
Dove, A. F., Sloan, J. P., Moulder, T. J. and Barker, A. Dressings of the nailbed following nail avulsion, 408-410
Doyle, Linda S. *With* Nathan, 167-170
Dundas, S. *With* Neilson, 218-220

E

Elliot, D. *With* Quaba, 66-71, 282-283
Elliot, D. The early history of contracture of the palmar fascia – Part 1: The origin of the disease: the curse of the MacCrimmons: the hand of benediction: Cline's contracture, 246-253
Elliot, D. The early history of contracture of the palmar fascia – Part 2: The Revolution in Paris: Guillaume Dupuytren: Dupuytren's Disease, 371-378

Elliot, D. and Bainbridge, L. C. Ulnar fasciocutaneous flap of the wrist, 311-312
Evans, D. and Weightman, B. The Pipflex splint for treatment of mallet finger, 156-158

Subject index

A

Abnormalities
cleft hand in Silver-Russell syndrome, 192-194
club hand
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
macrodactyly
foot-like congenital macrodactyly with syndactyly of the hand, 353-355
Madelung's deformity
editorial, 3-4
wrist pain in the Madelung's deformity of dyschondrosteosis, 11-15
Leri-Weill syndrome (dyschondrosteosis): a family study, 16-18
carpal tunnel syndrome in Madelung's deformity, 19-22
reverse Madelung's deformity with nerve compression, 23-27
polydactyly
duplicate thumbs: a survey of results in twenty patients, 50-53
radially deviated type of thumb polydactyly, 315-319
symphalangism
ten year follow-up of congenital fusion of proximal interphalangeal joints treated by flexible implant arthroplasty: a case report, 342-344
syndactyly
cleft hand in Silver-Russell syndrome, 192-194
foot-like congenital macrodactyly with syndactyly of the hand, 353-355
Abscess
hand infections with *Mycobacterium chelonei*: a case report and review of the literature, 331-332
septic arthritis of the hand due to *Mycobacterium marinum*, 333-334
Adhesions
flexor digitorum profundus comm[illegible] to thumb and index finger, associated with a post-traumatic distal adherence of both tendons, 72-74
Amputation
a web-saving skin incision for amputation of the third or fourth ray of the hand, 340-341
stumps
ray centralization without bone fixation for amputation of the middle finger, 97-99
traumatic
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
Anaesthesia
local
surgical release of the median nerve under local anaesthesia for carpal tunnel syndrome, 395-396
regional
brachial plexus anaesthesia for upper limb surgery: a review of eight years' experience, 195-198
out-patient surgery for Dupuytren's disease under intravenous regional anaesthesia, 257-258
Anastomosis, surgical
micro-arterial anastomosis using only two sutures and an autogenous cuff, 44-49
Anatomy, regional
the blood supply of the flexor retinaculum, 35-39
some aspects of lumbrical function, 54-59
the microvascular anatomy of the distal digital extensor tendon, 161-163
the arteriovenous pattern of the distal digital segment, 164-166
tendon excursions of the interossei and superficial hypothenar muscles: an anatomical study, 415-420
anatomical basis of dorsal forearm flap, 435-439
Aneurysm
traumatic aneurysms of two proper digital arteries in the same patient: a case report, 345-347
aneurysm of a common digital artery: resection and vein graft, 348-349
Aneurysmal bone cyst
aneurysmal bone cyst in the metacarpal of a child: a case report, 479-480
Anomalies *see* Abnormalities
Arteries
injuries
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
traumatic aneurysms of two proper digital arteries in the same patient: a case report, 345-347
aneurysm of a common digital artery: resection and vein graft, 348-349
Arthritis
piso-triquetral arthrosis as a cause of rupture of the profundus tendon of the little finger, 102-103
a cryptic cause of monarthritis in the hand: the juxta-articular osteoid osteoma, 221-223
silastic replacement of the trapezium for arthrosis – a twelve year follow-up study, 426-429
osteoarthritis *see* Osteoarthritis
rheumatoid *see* Book reviews, 109
Arthroplasty
ten year follow-up of congenital fusion of proximal interphalangeal joints treated by flexible implant arthroplasty: a case report, 342-344
tendon interposition arthroplasty of the first carpo-metacarpal joint 421-425
silastic replacement of the trapezium for arthrosis – a twelve year follow-up study, 426-429
Avulsion
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
fracture
articular fractures of the distal scaphoid, 87-91
avulsion fracture of the index metacarpal base: three case reports, 212-214
nail
dressings of the nailbed following nail avulsion, 408-410

B

Bandages
clinical fracture of the carpal scaphoid – supportive bandage or plaster cast immobilization? 75-76
alternative conservative treatment of mallet-finger injuries by elastic double-finger bandage, 154-155
dressings of the nailbed following nail avulsion, 408-410
Blood circulation
vibration white finger, 171-176

the possible role of vascular congestion in carpal tunnel syndrome, 397-399
hands up? A preliminary study on the effect of post-operative hand elevation, 430-434
Blood vessels
the blood supply of the flexor retinaculum, 35-39
the first dorsal metacarpal artery neurovascular island flap, 136-145
the arteriovenous pattern of the distal digital segment, 164-166
Bone
diseases
Madelung deformity (editorial), 3-4
wrist pain in the Madelung's deformity of dyschondrosteosis, 11-15
Leri-Weill syndrome (dyschondrosteosis): a family study, 16-18
reverse Madelung's deformity with nerve compression, 23-27
infarction
bone infarction as a cause of painful fingers in a child, 477-478
fracture *see* Fractures
Boutonnière deformity in Dupuytren's disease, 379-382

C

Carcinoma
adenocarcinoma
metastatic adenocarcinoma of the carpus: a case report, 306-307
squamous cell
carcinoma cuniculatum of the hand, 218-220
Carpal tunnel
the blood supply of the flexor retinaculum, 35-39
rupture of flexor tendons to the little finger due to bony irregularities in the carpal tunnel, 308-310
Carpal tunnel syndrome
carpal tunnel syndrome in Madelung's deformity, 19-22
fulminating carpal tunnel syndrome due to gout, 42-43
a *Mycobacterium malmoense* infection of the hand presenting as carpal tunnel syndrome, 328-330
assessment of sensory nerve conduction in carpal tunnel syndrome, before, during and after operation, 386-390
prediction of outcome of decompression for carpal tunnel syndrome, 391-394
surgical release of the median nerve under local anaesthesia for carpal tunnel syndrome, 395-396
the possible role of vascular congestion in carpal tunnel syndrome, 397-399
acute carpal tunnel syndrome: a case report, 400-401
amyloidosis as a cause of carpal tunnel syndrome in haemodialysis patients, 402-405
diagnosis
a diagnostic test for carpal tunnel syndrome using ultrasound, 40-41
carpal tunnel syndrome: can we do better? (editorial), 365-367
Phalen's test in the diagnosis of carpal tunnel syndrome, 383-385
history
the history of carpal tunnel syndrome, 28-34
occupation
occupation as a risk factor for impaired sensory conduction of the median nerve at the carpal tunnel, 167-170
vibration white finger, 171-176
Carpo-metacarpal joints
traumatic dislocation of the fourth and fifth carpo-metacarpal joints: a case report, 210-211
simultaneous dislocations of the interphalangeal and carpo-metacarpal joints of the thumb: a case report, 224-226
Carpus
osteosarcoma of the carpus, 303-305
metastatic adenocarcinoma of the carpus: a case report, 306-307
instability
carpal instability with volar flexion of the proximal row associated with injury to the scaphotrapezial ligament: report of two cases, 298-302
peri-triquetral-lunate dislocation associated with ulnar nerve palsy, 456-457
see also individual bones
Child
Leri-Weill syndrome (dysochondrosteosis): a family study, 16-18
cleft hand in Silver-Russell syndrome, 192-194
pigmented villonodular synovitis of the extensor tendon sheaths in a child, 313-314
foot-like congenital macrodactyly with syndactyly of the hand, 353-355
bone infarction as a cause of painful fingers in a child, 477-478
aneurysmal bone cyst in the metacarpal of a child: a case report, 479-480
Cicatrix
treatment of post-traumatic contracture of the hand, 118-129
a web-saving incision for amputation of the third or fourth ray of the hand, 340-341
Collateral ligaments
duplicate thumbs: a survey of results in twenty patients, 50-53
intra-articular fracture of the metacarpal head of the locked index finger due to forced passive extension, 320-322
locked metacarpo-phalangeal joint of the thumb, 469-473
Compartment syndromes
Vibrio vulnificus necrotizing fasciitis presenting with compartmental syndrome of the hand, 337-339
Compression of nerves – *see* Nerves
Computers
a simple inexpensive post-operative regime following surgery for Dupuytren's contracture, 259-261
Contracture
elbow flexion
elbow flexion contractures: treatment by anterior release and continuous passive motion, 286-287
first web space
treatment of post-traumatic contracture of the hand, 118-129
the lateral arm free flap in releasing severe contracture of the first web space, 146-150
Cysts
aneurysmal bone cyst in the metacarpal of a child: a case report, 479-480

D

Deformities *see* Abnormalities
Diathermy
cleaning of diathermy forceps during operation, 356
Digit *see* Fingers
Digital vessels *see* Fingers, blood supply
Dislocations
traumatic dislocation of the fourth and fifth carpo-metacarpal joints: a case report, 210-211
anterior radio-carpal dislocation: an isolated injury, 215-217
simultaneous dislocations of the interphalangeal and carpo-metacarpal joints of the thumb: a case report, 224-226
peri-triquetral-lunate dislocation associated with ulnar nerve palsy, 456-457
complex dislocation of the metacarpo-phalangeal joint of the index finger: a comparison of the surgical approaches, 466-468
the Essex-Lopresti injury: a variation, 450-452
of implants
interposition arthroplasty of the first carpo-metacarpal joint using abductor pollicis longus and part of flexor carpi radialis, 421-425

silastic replacement of the trapezium for arthrosis – a twelve year follow-up study, 426–429
Dressings *see* Bandages
Dupuytren's contracture
the long-term results of closed palmar fasciotomy in the management of Dupuytren's contracture, 254-256
out-patient surgery for Dupuytren's disease under intravenous regional anaesthesia, 257-258
a simple inexpensive post-operative management regime following surgery for Dupuytren's contracture, 259-261
La Maladie de Dupuytren. To incise or excise? 368-370
Boutonnière deformity in Dupuytren's disease, 379-382
history
the early history of contracture of palmar fascia, 246-253, 371-378

E

Early motion *see* Rehabilitation
Elbow
reverse Madelung's deformity with nerve compression, 23-27
elbow flexion contractures: treatment by anterior release and continuous passive motion, 286-287
the Essex-Lopresti injury: a variation, 450-452
Electromyography
prediction of outcome of decompression for carpal tunnel syndrome, 391-394
Electrophysiology
carpal tunnel syndrome: Can we do better? (editorial), 365-367
assessment of sensory nerve conduction in carpal tunnel syndrome before, during and after operation, 386-390
prediction of outcome of decompression for carpal tunnel syndrome, 391-394
Elst, Edouard Vander (obituary), 108
Epiphyses
free vascularised epiphyseal
transplantation in upper extremity reconstruction, 440-447
Essex-Lopresti injury: a variation, 450-452
External fixation *see* Fracture fixation, external

F

False aneurysm
traumatic aneurysms of two proper digital arteries in the same patient: a case report, 345-347
Fascia
ulnar fasciocutaneous flap of the wrist, 311-312
Fibroma
a neurilemmoma and a neurofibroma in the same nerve trunk, 96
Fingers
blood supply
the first dorsal metacarpal artery neurovascular island flap, 136-145
the microvascular anatomy of the distal digital extensor tendon, 161-163
the arteriovenous pattern of the distal digital segment, 164-166
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
injuries
the role of cross-finger flaps in the primary management of untidy flexor tendon injuries, 62-65
alternative conservative treatment of mallet-finger injuries by elastic double-finger bandage, 154-155
the Pipflex splint for treatment of mallet finger, 156-158
mallet finger: comparison between operative and conservative management in those cases failing to be cured by splintage, 159-160
fractures of the distal phalanges, 350-352
dressings of the nailbed following nail avulsion, 408-410
complex dislocation of the metacarpo-phalangeal joint of the index finger: a comparison of the surgical approaches, 466-468
Firearm wounds *see* Injuries, gunshot
Fixation *see* Fracture fixation
Flaps
cross-finger
the role of cross-finger flaps in the primary management of untidy flexor tendon injuries, 62-65
free
posterior interosseous island forearm flap 130-135
the lateral arm free flap in releasing severe contracture of the first web space, 146-150
anatomical basis of dorsal forearm flap, 435-439
groin
long term hand function without long finger extensors: a clinical study, 66-71
local
a web-saving skin incision for amputation of the third or fourth ray of the hand, 340-341
pedicle
the first dorsal metacarpal artery neurovascular island flap, 136-145
ulnar fasciocutaneous flap of the wrist, 311-312
skin
treatment of post-traumatic contracture of the hand, 118-129
Flexor tendons *see* Tendons
Forearm
anatomy
anatomical basis of dorsal forearm flap, 435-439
injuries
elbow flexion contractures: treatment by anterior release and continuous passive motion, 286-287
the small AO external fixator in the treatment of unstable distal forearm fractures, 294-297
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
the Essex-Lopresti injury: a variation, 450-452
rotation
measurement of forearm rotation: an evaluation of two techniques, 288-290
Fracture fixation
cast
clinical fracture of the carpal scaphoid – supportive bandage or plaster cast immobilization? 75-76
consequences of late immobilization of scaphoid fractures, 77-79
avulsion fracture of the index metacarpal base: three case reports, 212-214
external
the small AO external fixator in the treatment of unstable distal forearm fractures, 294-297
internal
non-union of the scaphoid: Russe graft vs Herbert screw, 83-86
ray centralization without bone fixation for amputation of the middle finger, 97-99
scaphoid fractures treated by Herbert screw fixation, 453-455
Fractures
metacarpal
avulsion fracture of the index metacarpal base: three case reports, 212-214
intra-articular fracture of the metacarpal head of the locked index finger due to forced passive extension, 320-322
phalanges
fractures of the distal phalanges, 350-352
radius
mal-union and dysfunction in Colles' fracture, 291-293

the small AO external fixator in the treatment of unstable distal forearm fractures, 294-297
the Essex-Lopresti injury: a variation, 450-452
scaphoid
clinical fracture of the carpal scaphoid – supportive bandage or plaster cast immobilization? 75-76
articular fractures of the distal scaphoid, 87-91
scaphoid fractures treated by Herbert screw fixation, 453-455
ununited
consequences of late immobilization of scaphoid fractures, 77-79
rupture of the flexor pollicis longus tendon resulting from the non-union of a scaphoid fracture, 80-82
non-union of the scaphoid: Russe graft vs Herbert screw, 83-86
articular fracures of the distal scaphoid, 87-91
scaphoid fractures treated by Herbert screw fixation, 453-455
see also Book reviews, 481
Fusion *see* Arthrodesis

G

Ganglia
the dorsal occult ganglion of the wrist and ultrasonography, 181-183
treatment of ganglia by a thread technique, 184-186
the treatment of dorsal wrist ganglia by radical excision, 187-191
Gout
fulminating carpal tunnel syndrome due to gout, 42-43
Graft
bone
non-union of the scaphoid: Russe graft vs Herbert screw, 83-86
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
the Essex-Lopresti injury: a variation, 450-452
tendon
post-operative management of flexor tendon grafting, 277-281
flexor tendon grafting 48 years after injury, 284-285
vein
aneurysm of a common digital artery: resection and vein graft, 348-349
see also Flaps

H

Haemangioma
locking of a metacarpo-phalangeal joint caused by a haemangioma of the volar plate, 323-324
Hand(s)
and the artist, 104-107
assessment
surgical audit (editorial), 235-236
functional deficit following loss of continuity of the long extensors of the fingers: a method of assessment, 282-283
elevation, post-operative
hands up? A preliminary study on the effect of post-operative hand elevation, 430-434
therapy *see* Rehabilitation
Hepworth, Barbara, 104-107
History
carpal tunnel syndrome, 28-34
Dupuytren's contracture, 246-253, 371-378
Hypertrophy
idiopathic thenar muscle hypertrophy, 100-101
foot-like congenital macrodactyly with syndactyly of the hand, 353-355
Hypoplasia
radially deviated type of thumb polydactyly, 315-319

I

Implants, artificial *see* Prostheses
Infections
a *Mycobacterium malmoense* infection of the hand presenting as carpal tunnel syndrome, 328-330
hand infections with *Mycobacterium chelonei*: a case report and review of the literature, 331-332
septic arthritis of the hand due to *Mycobacterium marinum*, 333-334
synovial hand infection from *Mycobacterium terrae*, 335-336
Vibrio vulnificus necrotizing fasciitis presenting with compartmental syndrome of the hand, 337-339
Injuries
crush
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
gunshot
transfer of sensory branches of radial nerve in hand surgery, 92-95
healing
dressings of the nailbed following nail avulsion, 408-410
industrial
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
medico-economic implications of industrial hand injuries in India, 325-327
surgical audit (editorial), 235-236
psychological aspects
psychological and physical aspects of occupational arm pain, 5-10
early psychological aspects of severe hand injury, 177-180
Instruments *see* Surgical instruments
Insurance
psychological and physical aspects of occupational arm pain, 5-10
medico-economic implications of industrial hand injuries in India, 325-327
Internal fixation *see* Fracture fixation, internal
Interphalangeal joints
duplicate thumbs: a survey of results in twenty patients, 50-53
mallet finger (editorial), 115-117
treatment of post-traumatic contracture of the hand, 118-129
the influence of wrist position on the minimum force required for active movement of the interphalangeal joints, 262-268
arthroplasty
ten year follow-up of congenital fusion of proximal interphalangeal joints treated by flexible implant arthroplasty: a case report, 342-344
dislocation
simultaneous dislocations of the interphalangeal and carpo-metacarpal joints of the thumb: a case report, 224-226
Ischaemia
vibration white finger, 171-176
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
Iselin, Marc (obituary), 230

J

Joints
instability
carpal instability with volar flexion of the proximal row associated with injury to the scaphotrapezial ligament: report of two cases, 298-302
interposition arthroplasty of the first carpo-metacarpal joint using abductor pollicis longus and part of flexor carpi radialis, 421-425
see also Book reviews, 109

K

Kienbock's disease
Kienbock's disease: two unusual cases, 463-465

L

Lacerations *see* Injuries
Ligaments, articular
carpal instability with volar flexion of the proximal row associated with injury to the scaphotrapezial ligament: report of two cases, 298-302
Lunate
peri-triquetral-lunate dislocation associated with ulnar nerve palsy, 456-457
classification of fresh fractures of the lunate, 458-462
Kienbock's disease: two unusual cases, 463-465

M

Madelung's deformity *see* Abnormalities
Malformations *see* Abnormalities
Malignant tumours *see* Carcinoma; Sarcoma
Mallet deformity
mallet finger (editorial), 115-117
mallet finger: a trial of two splints, 151-153
alternative conservative treatment of mallet-finger injuries by elastic double-finger bandage, 154-155
the Pipflex splint for treatment of mallet finger, 156-158
mallet finger: comparison between operative and conservative management in those cases failing to be cured by splintage, 159-160
the microvascular anatomy of the distal digital extensor tendon, 161-163
Median nerve
a neurilemmoma and a neurofibroma in the same nerve trunk, 96
see also Carpal tunnel syndrome
Metacarpal
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
avulsion fracture of the index metacarpal base: three case reports, 212-214
Metacarpo-phalangeal joint
intra-articular fracture of the metacarpal head of the locked index finger due to forced passive extension, 320-322
complex dislocation of the metacarpo-phalangeal joint of the index finger: a comparison of the surgical approaches, 466-468
locking
intra-articular fracture of the metacarpal head of the locked index finger due to forced passive extension, 320-322
locking of a metacarpo-phalangeal joint caused by a haemangioma of the volar plate, 323-324
locked metacarpo-phalangeal joint of the thumb, 469-473
Microcirculation
the blood supply of the flexor retinaculum, 35-39
the microvascular anatomy of the distal digital extensor tendon, 161-163
the arteriovenous pattern of the distal digital segment, 164-166
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
Microscopy, electron, scanning
micro-arterial anastomosis using only two sutures and an autogenous cuff, 44-49
flexor tendon healing, 237-245
Microsurgery
micro-arterial anastomosis using only two sutures and an autogenous cuff, 44-49
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
see also Book reviews, 481
Models, biological
flexor tendon healing, 237-245
Muscles
abnormalities
flexor digitorum profundus common to thumb and index finger, associated with a post-traumatic distal adherence of both tendons, 72-74
idiopathic thenar muscle hypertrophy, 100-103
ulnar nerve compression caused by a reversed palmaris longus muscle, 406-407
anatomy
tendon excursions of the interossei and superficial hypothenar muscles: an anatomical study, 415-420
flexors
some aspects of lumbrical function, 54-59
flexor digitorum profundus common to thumb and index finger, associated with a post-traumatic distal adherence of both tendons, 72-74
treatment of post-traumatic contracture of the hand, 118-129
hypothenar
tendon excursions of the interossei and superficial hypothenar muscles: an anatomical study, 415-420
interossei
idiopathic thenar muscle hypertrophy, 100-101
treatment of post-traumatic contracture of the hand, 118-129
tendon excursions of the interossei and superficial hypothenar muscles: an anatomical study, 415-420
lumbrical
some aspects of lumbrical function, 54-59
palmaris longus
ulnar nerve compression caused by a reversed palmaris longus muscle, 406-407
physiology
some aspects of lumbrical function, 54-59
the influence of wrist position on the minimum force required for active movement of the interphalangeal joints, 262-268
thenar
idiopathic thenar muscle hypertrophy, 100-101
Mycobacterium infections
a *Mycobacterium malmoense* infection of the hand presenting as carpal tunnel syndrome, 328-330
hand infections with *Mycobacterium chelonei*: a case report and review of the literature, 331-332
septic arthritis of the hand due to *Mycobacterium marinum*, 333-334
synovial hand infection from *Mycobacterium terrae*, 335-356

N

Nails
fractures of the distal phalanges, 350-352
dressings of the nailbed following nail avulsion, 408-410
Beau's lines following hand trauma, 411-413
Neoplasms
a neurilemmoma and a neurofibroma in the same nerve trunk, 96
a cryptic cause of monarthritis in the hand: the juxta-articular osteoid osteoma, 221-223
see also Carcinoma; Sarcoma
Nerves
abnormalities
foot-like congenital marcodactyly with syndactyly of the hand, 353-355

compression
reverse Madelung's deformity with nerve compression, 23-27
ulnar nerve compression caused by a reversed palmaris longus muscle, 406-407
occupation as a risk factor for impaired sensory conduction of the median nerve at the carpal tunnel, 167-170
vibration white finger, 171-176
see also Carpal tunnel syndrome
transfer
transfer of sensory branches of radial nerve in hand surgery, 92-95
Neurilemmoma *see* Neoplasms
see also Median, Radial or Ulnar nerve
Non-union of fractures *see* Fractures, ununited

O

Obituaries
Elst, Edouard Vander, 108
Iselin, Marc, 230
Occupational
diseases
psychological and physical aspects of occupational arm pain, 5-10
occupation as a risk factor for impaired sensory conduction of the median nerve at the carpal tunnel, 167-170
vibration white finger, 171-176
injuries *see* Accidents, occupational
therapy *see* Rehabilitation
Orthopaedic surgery
see Book reviews, 109-110, 228, 481
Osteoarthritis (osteoarthrosis)
piso-triquetral arthrosis as a cause of rupture of the profundus tendon of the little finger, 102-103
a cryptic cause of monarthritis in the hand: the juxta-articular osteoid osteoma, 221-223
silastic replacement of the trapezium for arthrosis – a twelve year follow-up study, 426-429
osteosarcoma of carpus, 303-305

P

Pain
psychological and physical aspects of occupational arm pain, 5-10
wrist pain in the Madelung's deformity of dyschondrosteosis, 11-15
bone infarction as a cause of painful fingers in a child, 477-478
Palmar fascia
contracture *see* Dupuytren's contracture
Paralysis *see* Ulnar nerve
see also Book reviews, 109
Peritendinous adhesions *see* Adhesions
Phalanx
fractures of the distal phalanges, 350-352
Physical therapy *see* Rehabilitation
Piso-triquetral joint
piso-triquetral arthrosis as a cause of rupture of the profundus tendon of the little finger, 102-103
Polydactyly
duplicate thumbs: a survey of results in twenty patients, 50-53
radially deviated type of thumb polydactyly, 315-319
Pronation
measurement of forearm rotation: an evaluation of two techniques, 288-290
mal-union and dysfunction in Colles' fracture, 291-293
the Essex-Lopresti injury: a variation, 450-452
Pseudoaneurysm *see* False aneurysm

R

Radial nerve
transfer of sensory branches of radial nerve in hand surgery, 92-95
the first dorsal metacarpal artery neurovascular island flap, 136-145
Radio-carpal joint
anterior radio-carpal dislocation: an isolated injury, 215-217
Radiography
Radio-ulnar joint
wrist pain in Madelung's deformity of dyschondrosteosis, 11-15
Leri-Weill syndrome (dyschondrosteosis) a family study, 16-18
the Essex-Lopresti injury: a variation, 450-452
Radius
Leri-Weill syndrome (dyschondrosteosis): a family study, 16-18
mal-union and dysfunction in Colles' fracture, 291-293
the small AO external fixator in the treatment of unstable distal forearm fractures, 294-297
Raynaud's disease
vibration white finger, 171-176
Ray resection
ray centralization without bone fixation for amputation of the middle finger, 97-99
radially deviated type of thumb polydactyly, 315-319
a web-saving skin incision for amputation of the third or fourth ray of the hand, 340-341
Rehabilitation
long term hand function without long finger extensors: a clinical study, 66-71
a simple inexpensive post-operative management regime following surgery of Dupuytren's contracture, 259-261
the influence of wrist position on the minimum force required for active movement of the interphalangeal joints, 262-268
post-operative management of flexor tendon grafting, 277-281
see also Book reviews, 227
see also Passive motion
Reinnervation
transfer of sensory branches of radial nerve in hand surgery, 92-95
Replantation
the arteriovenous pattern of the distal digital segment, 164-166
transmetacarpal amputations and replantation: the importance of the normal vascular anatomy, 204-209
Retinacular system
carpal tunnel syndrome in Madelung's deformity, 19-22
the blood supply of the flexor retinaculum, 35-39
rupture of flexor tendons to the little finger due to bony irregularities in the carpal tunnel, 308-310

S

Sarcoma
osteosarcoma of the carpus, 303-305
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
Scaphoid
clinical fracture of the carpal scaphoid – supportive bandage or plaster cast immobilization? 75-76
consequences of late immobilization of scaphoid fractures, 77-79
rupture of the flexor pollicis longus tendon resulting from the non-union of a scaphoid fracture, 80-82
non-union of the scaphoid: Russe graft vs Herbert screw, 83-86
articular fractures of the distal scaphoid, 87-91
scaphoid fractures treated by Herbert screw fixation, 453-455
Scapho-lunate ligament
the treatment of dorsal wrist ganglia by radical excision, 187-191
Scapho-trapezial ligament
carpal instability with volar flexion of the proximal row associated with injury to the scaphotrapezial ligament: report of two cases, 298-302

Scars *see* Cicatrix
Schwannoma
a neurilemmoma and a neurofibroma in the same nerve trunk, 96
Splints
treatment of post-traumatic contracture of the hand, 118-129
a simple inexpensive post-operative management regime following surgery for Dupuytren's contracture, 259-261
the modified Kleinert splint in Zone II flexor tendon injuries, 273-276
post-operative management of flexor tendon grafting, 277-281
in mallet deformity
mallet finger (editorial), 115-117
mallet finger: a trial of two splints, 151-153
the Pipflex splint for treatment of mallet finger, 156-158
Squamous cell carcinoma *see* Carcinoma, squamous cell
Stenosing tenosynovitis *see* Trigger finger
Supination
measurement of forearm rotation: an evaluation of two techniques, 288-290
mal-union and dysfunction in Colles' fracture, 291-293
the Essex-Lopresti injury: a variation, 450-452
Surgeon
surgical audit (editorial), 235-236
Surgical instruments
cleaning of bipolar diathermy forceps during operation, 356
a simple and effective suction device for draining hand wounds, 356-357
Surgical techniques
Bilhaut Cloquet procedure
duplicate thumbs: a survey of results in twenty patients, 50-53
Darroch procedure
Madelung deformity (editorial), 3-4
wrist pain in the Madelung's deformity of dyschondrosteosis, 11-15
Eaton's procedure
simultaneous dislocations of the interphalangeal and carpo-metacarpal joints of the thumb: a case report, 224-226
microvascular surgery
micro-arterial anastomosis using only two sutures and an autogenous cuff, 44-49
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
see also Book reviews, 109, 227, 481
Suture techniques
micro-arterial anastomosis using only two sutures and an autogenous cuff, 44-49
treatment of ganglia by a thread technique, 184-186
Swanson implant *see* Implants, artificial
Syndactyly
cleft hand in Silver-Russell syndrome, 192-194
foot-like congenital macrodactyly with syndactyly of the hand, 353-355
Synovitis
pigmented villonodular synovitis of the extensor tendon sheaths in a child, 313-314

T

Techniques
technical tips
cleaning of bipolar diathermy forceps during operation, 356
a simple and effective suction device for draining hand wounds, 356-357
see also Surgical techniques
Tendons
abnormalities
flexor digitorum profundus common to thumb and index finger, associated with a post-traumatic distal adherence of both tendons, 72-74
limitation of thumb flexion due to an unusual insertion of the flexor pollicis longus, 474-476
anatomy
tendon excursions of the interossei and superficial hypothenar muscles: an anatomical study, 415-420
arthroplasty
interposition arthroplasty of the first carpo-metacarpal joint using abductor pollicis longus and part of flexor carpi radialis, 421-425
blood supply
the microvascular anatomy of the distal digital extensor tendon, 161-163
flexor tendon healing, 237-245
extensor
the influence of wrist position on the minimum force required for active movement of the interphalangeal joints 262-268
functional deficit following loss of continuity of the long extensors of the fingers: a method of assessment, 282-283
pigmented villonodular synovitis of the extensor tendon sheaths in a child, 313-314
late rupture of the extensor pollicis longus tendon: the case against attrition, 448-449
see also Mallet deformity
flexor *see* Specific conditions
grafts
post-operative management of flexor tendon grafting, 277-281
flexor tendon grafting 48 years after injury, 284-285
injuries
the role of cross-finger flaps in the primary management of untidy flexor tendon injuries, 62-65
long term hand function without long finger extensors: a clinical study, 66-71
avulsion fracture of the index metacarpal base: three case reports, 212-214
flexor tendon healing, 237-245
flexor tendon injuries: the results of primary repair, 269-272
the modified Kleinert splint in Zone II flexor tendon injuries, 273-276
pathology
pigmented villonodular synovitis of the extensor tendon sheaths in a child, 313-314
repair
the role of cross-finger flaps in the primary management of untidy flexor tendon injuries, 62-65
rupture of the flexor pollicis longus tendon resulting from the non-union of a scaphoid fracture, 80-82
piso-triquetral arthrosis as a cause of rupture of the profundus tendon of the little finger, 102-103
flexor tendon healing, 237-245
flexor tendon injuries: the results of primary repair, 269-272
the modified Kleinert splint in Zone II flexor tendon injuries, 273-276
post-operative management of flexor tendon grafting, 277-281
rupture
rupture of the flexor pollicis longus tendon resulting from the non-union of a scaphoid fracture, 80-82
piso-triquetral arthrosis as a cause of rupture of the profundus tendon of the little finger, 102-103
rupture of flexor tendons to the little finger due to bony irregularities in the carpal tunnel, 308-310
late rupture of the extensor pollicis longus tendon: the case against attrition, 448-449
see also Book reviews, 227
Thumb
abnormalities
duplicate thumbs: a survey of results in twenty patients, 50-53
idiopathic thenar muscle hypertrophy, 100-101
radially deviated type of thumb polydactyly, 315-319

limitation of thumb flexion due to an unusual insertion of the flexor pollicis longus, 474-476
blood supply
posterior interosseous island forearm flap, 130-135
the first dorsal metacarpal artery neurovascular island flap, 136-145
injuries
transfer of sensory branches of radial nerve in hand surgery, 92-95
treatment of post-traumatic contracture of the hand, 118-129
the first dorsal metacarpal artery neurovascular island flap, 136-145
the lateral arm free flap in releasing severe contracture of the first web space, 146-150
simultaneous dislocations of the interphalangeal and carpo-metacarpal joints of the thumb: a case report, 224-226
locked metacarpo-phalangeal joint of thumb, 469-473
innervation
transfer of sensory branches of radial nerve in hand surgery, 92-95
surgery
duplicate thumbs: a survey of results in twenty patients, 50-53
transfer of sensory branches of radial nerve in hand surgery, 92-95
posterior interosseous island forearm flap, 130-135
simultaneous dislocations of the inter-phalangeal and carpo-metacarpal joints of the thumb: a case report, 224-226
radially deviated type of thumb polydactyly, 315-319
limitation of thumb flexion due to an unusual insertion of the flexor pollicis longus, 474-476
Tomography, X-ray computed
idiopathic thenar muscle hypertrophy, 100-101
Tourniquets
hands up? A preliminary study on the effect of post-operative hand elevation, 430-434
Traction
an improved nail-hook for Kleinert traction, 60-61
the modified Kleinert splint in Zone II flexor tendon injuries, 273-276
post-operative management of flexor tendon grafting, 277-281
Transplantation
free vascularised epiphyseal transplantation in upper extremity reconstruction, 440-447
Trapezium
interposition arthroplasty of the first carpo-metacarpal joint using abductor pollicis longus and part of carpi radialis, 421-425
silastic replacement of the trapezium for arthrosis – a twelve year follow-up study, 426-429
Trauma *see* Injuries
Trigger finger/thumb
results of surgery for trigger finger, 199-201
a survey of trigger finger in adults, 202-203
Triquetrum
rupture of flexor tendons to the little finger due to bony irregularities in the carpal tunnel, 308-310
peri-triquetral-lunate dislocation associated with ulnar nerve palsy, 456-457
Tumours *see* Neoplasms

U

Ulna
the small AO external fixator in the treatment of unstable distal forearm fractures, 294-297
wrist pain in the Madelung's deformity of dyschondrosteosis, 11-15
Leri-Weill syndrome (dyschondrosteosis): a family study, 16-18
Ulnar nerves
reverse Madelung's deformity with nerve compression, 23-27
ulnar nerve compression caused by a reversed palmaris longus muscle, 406-407
peri-triquetral lunate dislocation associated with ulnar nerve palsy, 456-457
Ultrasound
a diagnostic test for carpal tunnel syndrome using ultrasound, 40-41
the dorsal occult ganglion of the wrist and ultrasonography, 181-185

V

Vasculature *see* Blood circulation
Volar plate
locking of a metacarpo-phalangeal joint caused by a haemangioma of the volar plate, 323-324

W

Web
treatment of post-traumatic contracture of the hand, 118-129
the lateral arm free flap in releasing severe contracture of the first web space, 146-150
a web-saving skin incision for amputation of the third or fourth ray of the hand, 340-341
Wounds *see* Injuries
Wrist
the influence of wrist position on the minimum force required for active movement of the interphalangeal joints, 262-268
deformity
Madelung deformity (editorial), 3-4
wrist pain in the Madelung's deformity of dyschondrosteosis, 11-15
Leri-Weill syndrome (dyschondrosteosis): a family study, 16-18
reverse Madelung's deformity with nerve compression, 23-27
ganglia
the dorsal occult ganglia of the wrist and ultrasonography, 181-183
treatment of ganglia by a Thread technique, 184-186
the treatment of dorsal wrist ganglia by radical excision, 187-191
injuries
anterior radio-carpal dislocation: an isolated injury, 215-217
mal-union and dysfunction in Colles' fracture, 291-293
carpal instability with volar flexion of the proximal row associated with injury to the scaphotrapezial ligament: report of two cases, 298-302
see also Carpus; Radius; Scaphoid
see also Book reviews, 481

X

X-rays
traumatic dislocation of the fourth and fifth carpo-metacarpal joints: a case report, 210-211
a cryptic cause of monarthritis in the hand: the juxta-articular osteoid osteoma, 221-223
mal-union and dysfunction in the Colles' fracture, 291-293
the small AO external fixator in the treatment of unstable distal forearm fractures, 294-297
classification of fresh fractures of the lunate, 458-462
